### Tea Tree Essential Oil Safety Information

Tisserand and Young indicate that there is a low risk of skin sensitization when using Tea Tree topically. They recommend a dermal maximum of 15% and

precaution to avoid use of the oil if it has oxidized. Reading Tisserand and Young's full profile is recommended. [Robert Tisserand and Rodney Young, Essential Oil Safety (Second Edition. United Kingdom: Churchill Livingstone Elsevier, 2014), 440-445.]
